SUGGESTED CITATION: International Treatment Preparedness Coalition (ITPC); Global Fund; Matahari Global Solutions. PPPR 101 for CLM Implementers: An Online Toolkit. September 2025.

MATAHARI

MATAHARI GLOBAL SOLUTIONS is a global health consultancy firm focusing on global health solutions with local relevance. Registered in Kuala Lumpur and with consultants based globally, our work has covered a wide range of global health issues using robust and

inclusive methodologies. This includes: work to develop the African Union Health Workforce Compact in consultation with African Member States; market/critical path analyses on syphilis/gonorrhea assays and novel non-sputum diagnostics; in-depth research on transgender legal recognition and impact on access to healthcare; an evaluation on impacts of civil society advocacy on paediatric TB; the evaluation of multi-country HIV projects across Africa, Asia, Eastern Europe and Central Asia, and Latin America; and research on COVID-19 access gaps with ITPC.

The **INTERNATIONAL TREATMENT PREPAREDNESS COALITION (ITPC)** is a global network of people living with HIV and community activists working to achieve universal access to optimal HIV treatment for those in need. ITPC is an issue-based non-profit organization working to achieve health and social justice for all through robust community engagement.

ITPC actively advocates for health access across the globe through its focus on three strategic pillars: intellectual property and access to medicines (#MakeMedicinesAffordable); community-led monitoring (CLM) and accountability (#WatchWhatMatters); and activism and capacity building (#BuildResilientCommunities).

With the support of ITPC Global and the Global Fund (GF), Matahari developed this customisable workshop toolkit, originally for use in country-level workshops for Community-Led Monitoring implementers in Burkina Faso, Senegal, and Central African Republic. The initial workshop toolkit was based on original writing from Matahari and the Global Fund COPPER initiation workshop in Johannesburg in 2024. The final version presented here was refined through a training-of-trainers led by Matahari, the customisation for each country context, and the feedback from each country workshop.

This toolkit was informed by the experience and insights of numerous experts in PPPR and CLM. Special thanks go to Innocent Laison, Consultant and lead facilitator for the METAL Consortium PPPR country workshops, as well as the COPPER partners and workshop participants in Burkina Faso, Central African Republic, and Senegal. Our thanks also to (listed alphabetically by surname):

Sibelle Balanga	Coordinator, Seni Na Maiengo, Central African Republic [COPPER partner]
Oliver I D. Barrameda	COPPER CE Project Coordinator, ACHIEVE Inc., Philippines [COPPER partner]
Emily Bass	Independent Consultant, Facilitator of Johannesburg COPPER Workshop
Jelena Bozinoski	Program Manager, WatchWhatMatters, ITPC Global
Ngombe Lebeté Cyriaque Juvenil	Executive Director, Civil Society Platform of Community Organisations working on Health (previously Executive Director, Seni Na Maiengo), Central African Republic [COPPER partner]
Innocent Laison	Board member of ITPC West Africa and Independent Consultant
Marguerite Massinga Loembé	Senior Consultant: Health Systems Strengthening, Matahari Global Solutions
Hamidou Ouédraogo	Directeur Exécutif National (National Executive Director), Réseau Accès aux Médicaments Essentiels (RAM), Burkina Faso [COPPER partner]
Nadia Rafif	Advocacy and Influence Lead, ITPC Global Team
Massogui Thiamdoume	Directeur Technique (Technical Director), Alliance Nationale des Communautés pour la Santé (ANCS), Senegal [COPPER partner]
Donald D. Tobaiwa	Director, Jointed Hands Welfare Organisation

*This toolkit was reviewed by **Dr Fifa A Rahman**, Matahari Global Solutions; **Nadia Rafif** and **Jelena Bozinoski**, ITPC; and **Innocent Laison**, Independent Consultant (Senegal). An earlier version of this was discussed and adapted in collaboration with COPPER country partners from West Africa during a virtual training-of-trainers workshop.*
