

PPPR 101 for CLM Implementers

AN ONLINE TOOLKIT

SUMMARY

CLM can be an effective tool to negotiating your participation in local, national, and global PPPR processes.

This toolkit was developed and piloted as part of the GF COPPER CLM and PPPR initiative in 2024 and 2025. Future pandemics are certain and communities have much to contribute to public health policy making. CLM can be an effective tool to negotiating your participation in local, national, and global PPPR processes. If you use this toolkit, we would love to hear from you! Your feedback, suggestions, and experiences are welcome as we together work for a public health system that is more prepared and responsive to HTM community needs. Do not hesitate to consult also APCASO.

Please email us at Admin@itpcglobal.org. if you have anything to share or would like to inquire about support for CLM and PPPR workshops and project implementation.
